REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 5,891,505 to Schuman et al. The improvement comprises the second pressure changing device changing the pressure in the pressure vessel from the intermediate pressure state that is substantially above atmospheric pressure to the other one of the two pressure states for the purposes of reducing the size and cost of the high pressure pressing device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Schuman et al. is cited for the showing of a high pressure pressing device similar to applicant's but lacking the two stage pressurization of the pressure vessel by the first then second pressure changing device.
